Professional Summary

Full Stack Web Developer with experience building scalable web applications using **JavaScript, Node.js, Express.js, React.js, MongoDB, PostgreSQL, REST APIs** and modern development tools. Skilled in developing responsive front-end interfaces, designing backend services, integrating databases, implementing authentication, and deploying projects using Git-based workflows. Passionate about building efficient, user-friendly applications while continuously learning modern technologies.

Technical Skills

Languages: Java, JavaScript, Python, SQL

Frontend: HTML5, CSS3, Tailwind CSS, React.js, Redux Toolkit, EJS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, PostgreSQL, Oracle SQL, PL/SQL, Redis

Tools: Git, GitHub, Postman, VS Code, Oracle APEX, Supabase, Socket.IO

Projects

TaskDrobe – Real-Time Project & Workspace Management Platform *Node.js — Express.js — PostgreSQL — Redis — Socket.IO — EJS*

- Built an enterprise Role-Based Access Control (RBAC) workspace featuring real-time Socket.IO direct chat and live notifications.
- Engineered conflict-free team meeting scheduling, threaded project discussions, and Redis-cached analytics for fast dashboard rendering.
- Integrated Supabase Storage via memory buffering for secure, cloud-based project attachment and avatar uploads.
- Implemented database-level PostgreSQL triggers to automatically clear orphaned records and maintain strict data integrity without backend overhead.

Vehicle License Plate Detection and Recognition System *Python — YOLOv7 — OpenCV — CNN — OCR*

- Developed an automated computer vision system capable of detecting and recognizing vehicle license plates from images.
- Integrated YOLOv7 for high-accuracy license plate detection with an OCR pipeline for character extraction.
- Implemented image preprocessing using OpenCV to improve recognition accuracy under varying lighting and image quality conditions.
- Applied CNN-based character recognition techniques to improve license plate text extraction.

MEDICURA – Smart Medicare Appointment System *Oracle APEX — SQL — PL/SQL — HTML — CSS — Bootstrap*

- Built a web-based healthcare management system allowing patients to book appointments with specialist doctors.
- Designed relational database schemas and implemented business logic using SQL and PL/SQL.

- Developed responsive user interfaces using Oracle APEX, HTML, CSS, and Bootstrap.
- Implemented secure patient record and prescription upload functionality.

URL Shortener

Node.js — Express.js — MongoDB — EJS

- Built a URL shortening application capable of generating unique short links for long URLs.
- Implemented click analytics to track the number of visits for each generated URL.
- Integrated MongoDB for persistent storage and Express.js for backend routing.

Education

College of Engineering & Management, Kolaghat <i>Bachelor of Technology in Information Technology</i>	2022 – 2025 <i>CGPA: 8.1</i>
Dr. Meghnad Saha Institute of Technology <i>Diploma in Computer Science & Technology</i>	2019 – 2022 <i>CGPA: 8.0</i>

Certifications

- | | |
|--|-----------|
| • Oracle APEX Xcelerate – INOAUG | July 2024 |
| • Web Development with HTML, CSS & JavaScript Specialization – YHills | May 2024 |

Achievements

- Selected among the **Top 10 Teams** in the **Oracle APEX Xcelerate Hackathon 2024**.
- Continuously improving problem-solving skills through Data Structures and Algorithms using Java.
